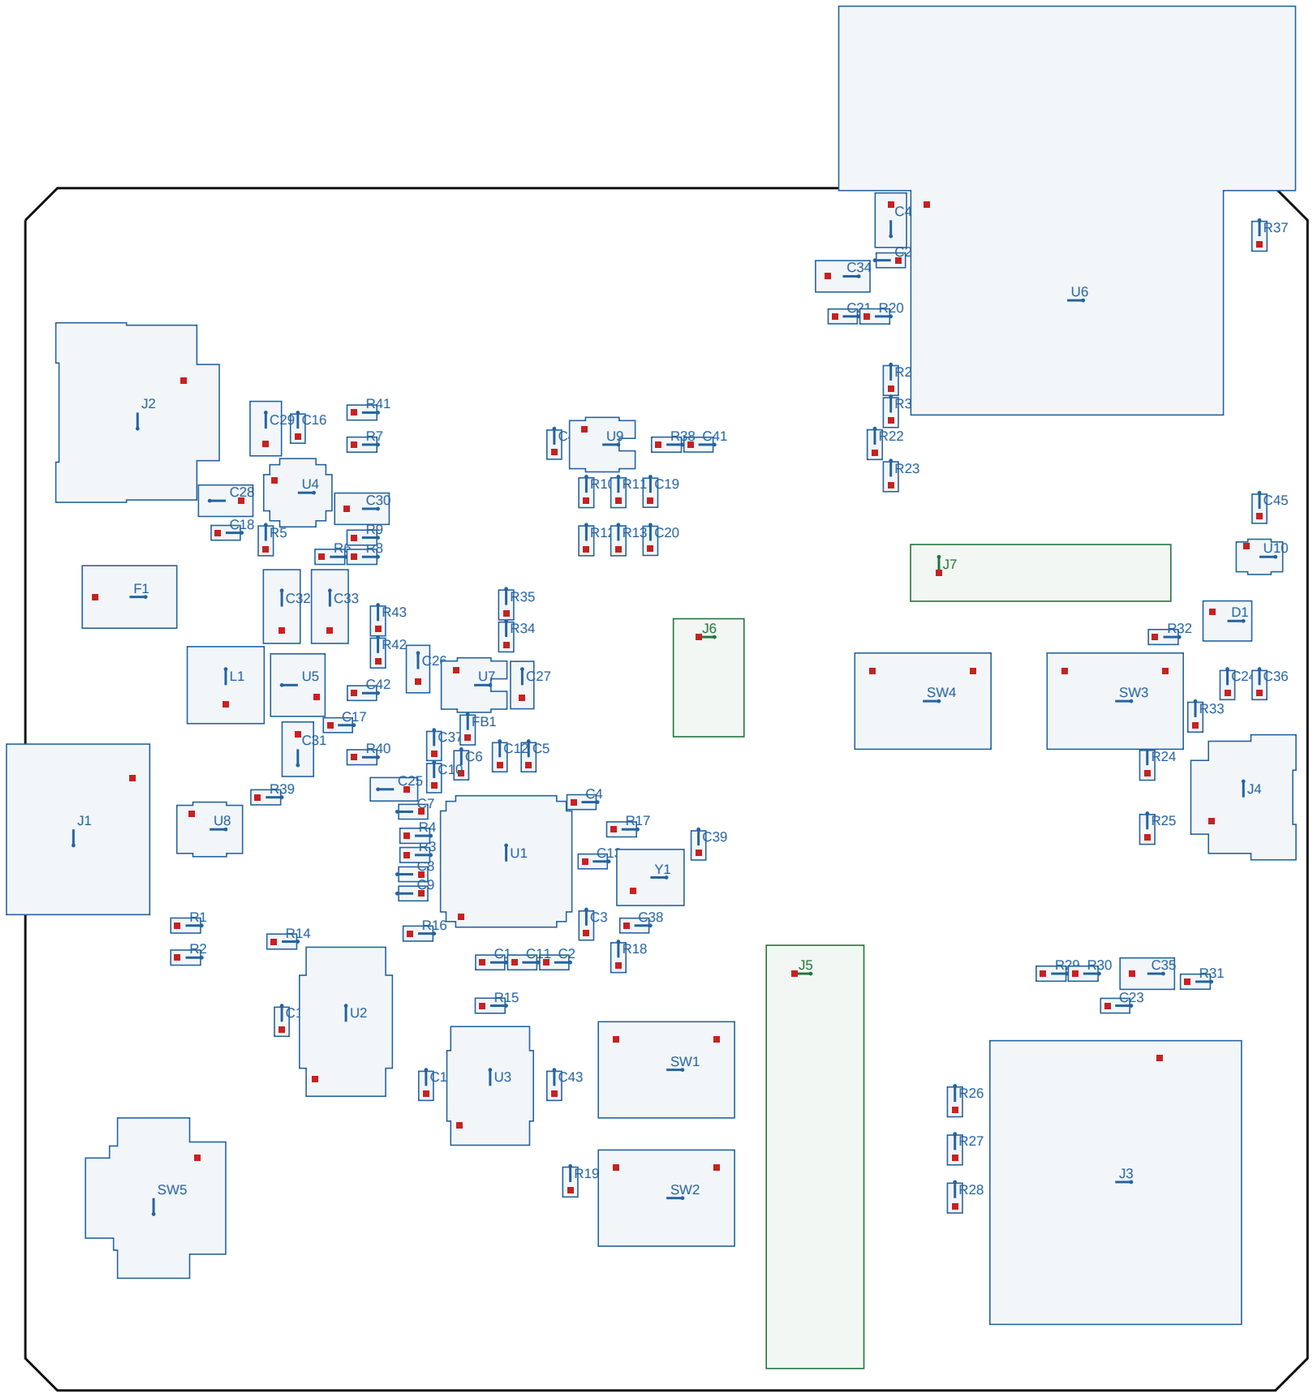
ATLAS2350 REV A - COMPLETE TOP ASSEMBLY

Top view: mm, X right/Y down; red = pin1 or USB A1



All 115 real components populated by PCBWay. Red markers identify physical pad1 / USB A1; not universal polarity.
Envelope polygons are courtyards, including RF keepout, not physical package edges. Reconcile anchors/angles with pinout and centroid-source.csv.

Atlas2350 Rev A - population / CAD anchors - 1

All fitted. X right / Y down, mm. Saved KiCad rotations CCW, degrees. See centroid CSV for body centers.
